EDUCATION

Mapua Malayan Colleges Laguna

2022-2026

Bachelor of Science in Computer Science, Specialization in Data Science and Analytics

PROJECTS

Stock Price Analytics Pipeline

End-to-end analytics pipeline using Databricks, Snowflake, and Power BI.

- Built a medallion architecture (Bronze/Silver/Gold) using Delta Live Tables to transform raw stock data into analytics-ready tables.
- Implemented dimensional modeling (fact_stock_prices, dim_stock) with data quality checks to support analytical reporting.
- Loaded curated Gold tables into Snowflake and developed Power BI dashboards for trend and volume analysis.

Azure Spotify Data Engineering Pipeline

Cloud-native data pipeline using Azure Data Factory and Databricks.

- Designed incremental ingestion from Azure SQL Database using ADF with watermark-based loading into ADLS Gen2.
- Processed streaming data using PySpark and Auto Loader, implementing medallion architecture with Unity Catalog governance.
- Built a star schema (4 dimensions + 1 fact) in the Gold layer using Delta Live Tables, implementing Slowly Changing Dimension (SCD Type 2) to preserve historical changes with data quality expectations.

CERTIFICATIONS

Google Cloud Computing Foundations: Cloud Computing Fundamentals

May 2024

Introduced core cloud computing concepts, infrastructure, and Google Cloud services relevant to scalable data solutions

Google Cybersecurity Professional Certificate

Aug 2023

Foundations of Cybersecurity, Network Security, Linux & SQL, SIEM tools, Python automation, and Incident Response

SKILLS

Languages: Python, SQL

Data Engineering: PySpark, Delta Lake, Databricks (DLT, Unity Catalog)

Cloud Platform: Microsoft Azure (Azure Data Factory, Azure SQL Database, Azure Storage Account)

Data Warehousing: Snowflake

Visualization: Power BI

Version Control: Git
